

As a longtime listener of the K-LOVE radio signal in my local area, I would like to encourage the FCC to continue allowing K-LOVE to operate on the local FM translators. K-LOVE provides family friendly radio format that is not provided on any other radio frequencies in my area. There are simply no other alternatives for this type of programming in the Tri-Valley. K-LOVE provides radio that is a safe alternative for my young family, and for many families who live in this community. If LPFM were to displace this service, my family and the many families of this community who listen to K-LOVE would no longer have an alternative for family friendly programming. I have been in local restaurants in my area that play K-LOVE because they know it provides music that is safe for all ages to listen to. It would be in the best interest of the public if K-LOVE could continue to provide this type of programming in the community. Programming that would not be available if LPFM were to replace it. I urge you to preserve this service in the interest of the public.

Sincerley,

Brian Ackley
